4 First-aid measures

(a) A description of necessary first aid measures, subdivided according to the different routes of exposure (inhalation, ingestion, skin and eye contact):

Inhalation:	Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Seek immediate medical attention.
Eye contact:	Immediately flush eyes gently with plenty of water for at least 15 minutes while holding eyelids apart. If symptoms persist or there is visual difficulty, seek medical attention.
Skin Contact:	For liquid contact, treat for frostbite if necessary. Wash clothing before reuse. Seek medical attention if symptoms persist. In case of contact, immediately wash contaminated area with plenty of water for at least 15 minutes.
Ingestion:	Aspiration into the lungs can cause serious damage. Contact a physician, medical facility, or poison control center immediately. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into lungs. Have victim drink 8 to 10 ounces of water to dilute the material in the stomach. Do not induce vomiting.

(b) The most important symptoms and effects, whether acute or delayed: May be fatal if swallowed and enters airways Causes skin irritation May cause an allergic skin reaction Causes serious eye irritation May cause drowsiness or dizziness

(c) An indication of immediate medical attention and special treatment needed, if necessary: Because of possible disturbances of cardiac rhythm, catecholamine drugs, such as epinephrine, should be used only in situations of emergency life support. This material is an aspiration hazard.

5 Fire-fighting measures

(a) Suitable and unsuitable extinguishing media:

Suitable extinguishing media:	Use CO ₂ , foam or dry chemical. Use dry chemical, alcohol-resistant foam, CO ₂ .
Unsuitable extinguishing media:	No data available

(b) Specific hazards arising from the hazardous product, such as the nature of any hazardous combustion:

This product contains a component(s) that is considered an extremely flammable gas(es), which has vapors that are heavier than air and may travel along the ground or be moved by ventilation and ignited by heat, pilot lights, or other flames and ignition sources at locations distant from the material's handling point. Containers may rupture or explode under fire conditions. "Empty" containers retain product residue and can be dangerous.

(c) Special protective equipment and precautions for firefighters:

Water is generally not effective and may spread fire; however, water spray may be used from a safe distance to cool closed containers and

protect surrounding area.

6 Accidental release measures

(a) Personal precautions, protective equipment and emergency procedures:

No data available

(b) Methods and materials for containment and cleaning up:

Place absorbent materials into container and close it tightly. Dispose of container properly. Clean up with absorbent material. If runoff occurs, notify authorities as required. Avoid run-off into storm sewers and ditches which may lead to natural waterways. Stop or reduce discharge if it can be done safely. Wear appropriate personal protective equipment (PPE). Remove all sources of ignition. Ventilate contaminated area.

7 Handling and storage

(a) Precautions for safe handling:

Normal precautions common to safe manufacturing practice should be followed in handling and storage. This material can be harmful or irritating. Avoid prolonged or repeated breathing of vapor. Use with adequate ventilation. Do not use near ignition sources. Avoid prolonged or repeated contact with skin.

(b) Conditions for safe storage, including any incompatibilities:

Conditions for safe storage:

Store away from incompatible materials such as materials that support combustion (oxidizing materials) and corrosive materials (strong acids or bases). Ground all equipment and cylinders before use. Store away from oxygen cylinders or other oxidizing materials and possible ignition sources. Do not store at temperatures above 122 degrees F. Empty container may contain residues which are hazardous. Store in a cool, dry, well ventilated area away from all sources of ignition.

(b) Appropriate engineering controls: Ventilation is required to maintain operator exposure below published exposure limits.
 Ventilation should be adequate to prevent exposures above the limits indicated below in this section of the SDS (from known, suspected or apparent adverse effects).

(c) Individual protection measures, such as personal protective equipment:

Respiratory Protection: Use NIOSH approved respirator where there is likelihood of inhalation of the product mist, spray or aerosol. A supplied air respirator should be used if ventilation is not sufficient to maintain exposure limits.

Eye and face protection: Wear chemically resistant safety glasses with side shields when handling this product. Wear additional eye protection such as chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid or airborne material. Have an eye wash station available.

Skin Protection: The use of chemically resistant gloves is recommended if there is any possibility of prolonged or repeated liquid contact with skin.
